Who Am I?

I'm a high school senior who's always had a strong interest in experimenting with computers.

Outside of tech, I've stayed socially active with two seasons of Varsity athletics and being the Vice President of my school's Model United Nations club.

Interested?

Don't hesitate to shoot me an email or connect with me on LinkedIn using my contact information above! I'd love to get in touch if you've read this far.

Aspirations

Government Cybersecurity → My Own Firm

I aspire to build a career in offensive cybersecurity, ideally beginning by working for an agency like the NSA where I can develop my skills in penetration testing, red team operations, and offensive security. Ultimately, I want to use that experience to start and own my own cybersecurity firm, helping organizations identify and exploit vulnerabilities before real attackers can.

Job-Related Skills

Server Administration

By managing a **Proxmox** server running self-hosted projects like **Jellyfin** and **Immich**, I have acquired hands-on experience with **SSH** based remote administration, **port forwarding**, and **firewall configuration** to securely manage my devices.

Wargames

Through resources like **PicoCTF** and **HackTheBox Academy**, I've developed practical skills in threat assessment, exploiting vulnerabilities, and protecting data, which will prepare me well for future cybersecurity roles.

My Education (So Far!)

George R. Martin Elementary School

Here I was first introduced to coding with **Scratch**, which inspired me to learn **Python** and eventually **video-game modding**.

Dr. Kevin M. Hurley Middle School

Here I developed a strong interest in **Cybersecurity** from sites like **PicoCTF** and podcasts like **Darknet Diaries**. I also volunteered here as a **Robotics Club** coach, though this program is currently on pause.

Seekonk High School, Class of 2027

I am currently enrolled in the highest available **AP** and **Honors** courses offered by my school. I've also participated in **Model UN**, **Ice Hockey**, and **Lacrosse**, where I have developed strong **teamwork** and **communication** skills.

Higher Education

I plan to pursue higher education, with a strong interest in schools such as **Carnegie Mellon University**, **Syracuse University**, **UMass Amherst**, and the **University of Maryland**.
